

## Solution Architecture

|                      |              |
|----------------------|--------------|
| <b>Date</b>          | 28 June 2026 |
| <b>TeamID</b>        |              |
| <b>ProjectName</b>   | Smart Lender |
| <b>Maximum Marks</b> | 5 Marks      |

### Solution Architecture Diagram:

Provide a high-level visual representation of your solution's architecture. Use the structural layout below as a template to map out your Presentation Layer, Application Layer, and Data Layer. Fill in the specific technologies and components for your project directly into the boxes to create your architectural diagram.

## Component Description Table

| ComponentName             | Description/RoleinArchitecture                                | TechnologiesUsed              |
|---------------------------|---------------------------------------------------------------|-------------------------------|
| <i>Presentation Layer</i> | <i>User interface to enter loan details and view results.</i> | HTML, CSS, Flask              |
| <i>API Gateway</i>        | Handles requests and connects frontend with ML model          | <i>Python , Flask</i>         |
| ML Prediction Service     | Processes data and predicts loan approval                     | Scikit-learn, XGBoost, Joblib |
| <i>Database</i>           | Stores dataset and trained model files                        | CSV Dataset, .pkl Model Files |
