

Brainstorming & Idea Prioritization Template

Date	24 June 2026
TeamID	
ProjectName	Smart Lender
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Lalasa Annam	Predict loan approval using Machine Learning classification models.	Core ML Model	1
2	Sreya Bondili	Develop a Flask-based web application for loan eligibility prediction.	Web Application	1
3	Ega Kavyasri	Perform data preprocessing, missing value handling, and feature encoding to improve model accuracy.	Data Preprocessing	2
4	Tejaswi Pemmasani	Compare multiple ML algorithms (Decision Tree, Random Forest, KNN, XGBoost) and select the best model.	Model Development	2
5	Lalasa Annam	Design an interactive user interface to accept applicant details and display prediction results with confidence.	User Interface	1
6	Shreya Bondili	Integrate the trained model with Flask and deploy the complete Smart Lender application.	Deployment	1

Brainstorming & Idea Prioritization Template

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Build a machine learning model for loan eligibility prediction	High	High	1	Yes
2	Develop a Flask web application with user-friendly interface	High	High	2	Yes
3	Compare multiple ML algorithms and deploy the best-performing model	Medium	High	3	Yes
