Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions <i>What does the customer do?</i>	• Opens the Smart Lender web application. • Reads the application overview and understands the loan prediction service. • Clicks on the loan eligibility prediction option.	• Enters applicant details such as gender, marital status, education, employment status, income, loan amount, loan term, credit history, and property area. • Submits the loan application details through the prediction form. • Waits for the ML model to analyze the data.	• Views the loan approval prediction result. • Checks the confidence score provided by the system. • Uses the prediction result for further loan application decisions or verification.
Touchpoint <i>What part of the service do they interact with?</i>	• Smart Lender home page. • Navigation options. • Loan prediction button.	• Loan application input form. • Flask backend application. • Machine Learning prediction model (XGBoost).	• Prediction result page. • Loan approval/rejection message. • Confidence percentage output.

Customer Thought <i>What is the customer thinking?</i>	• Can this system help me know my loan approval chances? • Is the application simple to use? • Will this reduce the loan approval waiting time?	• I hope I entered the correct applicant details. • The prediction should be generated quickly. • I want an accurate assessment of my loan eligibility.	• Now I understand my loan approval possibility. • The prediction helps me prepare further documents or actions. • This system makes the loan evaluation process easier.
Customer Feeling <i>What is the customer feeling?</i>	• Curious. • Interested. • Hopeful about faster loan evaluation.	• Focused. • Expectant. • Confident that the system will analyze the application	• Satisfied with quick prediction. • Relieved if approved. • Alert and prepared if rejected or requires further verification.
Process Ownership <i>Who is in the lead on this?</i>	Project Team / Frontend Development Team (Flask UI and user interaction)	Backend Development Team & Machine Learning Model Team (Data processing, XGBoost model, prediction logic)	Prediction System & Financial Decision Team (Loan officers / banking professionals using the prediction result)
Opportunities <i>How can we improve this stage?</i>	• Improve user interface design. • Add more guidance about required loan details. • Make the application mobile-friendly.	• Integrate real-time financial data sources. • Improve input validation. • Add automated document verification. • Improve prediction speed and accuracy.	• Display detailed prediction explanation. • Add risk analysis insights. • Provide personalized loan recommendations. • Integrate notifications for application updates.
