

Demonstration of Proposed Features

Date	1 July 2026
Team ID	
Project Name	Smart Lender
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Loan Eligibility Prediction	Predicts whether a loan application is approved or rejected using a trained ML model.	Implemented	Yes	Core functionality completed.
2	Data Preprocessing	Handles missing values, encodes categorical data, and scales features before prediction.	Implemented	Yes	Applied during model training and prediction.
3	Multiple Model Comparison	Evaluates Decision Tree, Random Forest, KNN, and XGBoost to select the best model.	Implemented	Yes	Best-performing model deployed.
4	Flask Web Application	Provides a web interface for entering applicant details and viewing prediction results.	Implemented	Yes	User-friendly interface developed.
5	Prediction Confidence Score	Displays the confidence level of the predicted loan approval status.	Implemented	Yes	Confidence percentage shown with prediction.
6	Error Handling & Input Validation	Handles invalid inputs and missing model files with appropriate error messages.	Implemented	Yes	Improves application reliability.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6

Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
