

Scalability & Future Plan

Date	1 July 2026
Team ID	
Project Name	Smart Lender
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Prediction is based on existing historical loan data	Limited adaptability to new financial trends	High
2	No database integration for storing user applications and predictions	User history and analysis cannot be maintained	Medium
3	Limited user management features	No personalized user experience	Medium

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Deployed application supports multiple users through Render	Use scalable cloud infrastructure for higher traffic
2	Data Storage	Model uses dataset files	Integrate MySQL/MongoDB to store user applications and predictions
3	Performance	XGBoost model is used for prediction	Retrain model with larger datasets and optimize performance
4	Security	Basic input validation implemented	Add authentication, authorization, and HTTPS security

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 1	Real-time financial data integration	2 Months	Improve prediction using updated information
Phase 2	Database integration	3 Months	Store and manage user applications and prediction history
Phase 3	User login and authentication	4 Months	Improve security and personalised access
Phase 4	Advanced dashboard and analytics	6 Months	Provide better insights and decision-support
